

2020

GRADUATE REPORT

Northeast
community college

Northeast
Community
College is
dedicated to
the success of
students and
the region it
serves.

ACCREDITATION

Northeast Community College is accredited by the Higher Learning Commission to award two-year Associate of Arts, Associate of Science, Associate of Applied Science, and Associate in Nursing degrees; one-year diplomas; and certificates. This regional accrediting body is located at 30 North LaSalle Street, Suite 2400, Chicago, IL, 60602-2504. The office can be contacted by calling (800) 621-7440 or (312) 263-0456. The College is also approved by the Nebraska State Department of Education.

SERVICE AREA

Northeast Community College's service area consists of 20 counties in northeast and north central Nebraska with a total population of approximately 162,500. The district is nearly 200 miles in length and covers approximately 14,400 square miles. The main campus is located in Norfolk, Nebraska, which has a population of approximately 23,500. Northeast has Extended Campus locations in O'Neill, South Sioux City, and West Point and Regional Offices in Ainsworth and Hartington.

Northeast Community College is a member of the National Association of Colleges and Employers (NACE) and complies with the "Professional Standards for College and University Career Services" adopted by the Association.

BOARD OF GOVERNORS

Del Ames, Neligh	Julie Robinson, Norfolk
Steve Anderson, Concord	Jeff Scherer, Beemer
Donovan Ellis, Pierce	Nicole Sedlacek, O'Neill
Arlan Kuehn, South Sioux City	Carol Sibbel, O'Neill
Dr. Terry Nelson, West Point	Gene Willers, Pilger
Dirk Petersen, Norfolk	

Northeast Community College does not discriminate on the basis of race, color, gender, religion, national or ethnic origin, military veteran status, political affiliation, marital or family status, age, disability, sexual orientation, gender expression or identity in education programs, admissions policies, employment policies, financial aid or other College administered programs and activities. It is the intent of Northeast Community College to comply with both the letter and the spirit of the law in making certain

discrimination does not exist in its policies, regulations and operations. Inquiries may be addressed to the Northeast Compliance Officer for Title IX, ADA, Section 504; Associate Vice President of Human Resources, 801 East Benjamin Avenue, P.O. Box 469, Norfolk, NE 68702-0469; phone: 402-844-7046; email: complianceofficer@northeast.edu; or mail: Office for Civil Rights, U.S. Department of Education, One Petticoat Lane, 1010 Walnut Street, 3rd Floor, Suite 320, Kansas City, MO 64106.

PRESIDENT'S MESSAGE

Dear friends,

Graduates of Northeast Community College have demonstrated grace under pressure during this time of COVID-19. The Graduate Report articulates how our students are utilizing their education in our evolving normal. It further confirms that Northeast's quality academic programs provide the foundation to fill the needs of our region's and our nation's workforce in a post pandemic world.

Nebraska's community colleges serve as a major economic stimulus for building the state's skilled workforce. We prepare students to enter high skill, high wage, high demand (H3) occupations and offer transfer opportunities to four-year institutions. Each year, students graduate from Northeast Community College - many of whom leave with more than one degree - in order to do their part to fuel the continued need for a skilled workforce.

The 2020 Graduate Report is evidence of that. In this report, you will learn that 98% of graduates from Dec. 2019, and May and Aug. 2020, are employed or continuing their education. Of those in the workforce, data demonstrates that 90% of those who earned degrees, diplomas, or certificates in many of our stellar career and technical education programs are employed in their fields of study.

This information is reinforced by the diligent work of Terri Heggemeyer, director of Career Services, and her assistant, Amy Koehler, who obtained information from 94% of graduates, which allows for an accurate and detailed report. I would also like to express my appreciation to our graduates for responding to a survey in order for Northeast to compile a precise count.

Thank you for your support of Northeast Community College.

Sincerely,

Leah A. Barrett, Ed.D., MBA
President

DIRECTOR'S MESSAGE

I would like to acknowledge these graduates' resilience, intellect, and grit as they worked through a global pandemic. They completed all the academic requirements of their program and fulfilled a notable accomplishment.

The annual Graduate Report provides insight into the various career and educational paths upon which our graduates have embarked. The results are impressive, and we are exceptionally proud of the positive outcomes.

Faculty and staff were creative and innovative in their teaching and programming to ensure students continued to learn, were challenged, and met goals. Through the collaborative relationships, our graduates' employment and transfer opportunities remained strong.

Please review this report to see the outstanding accomplishments of our graduates. The Class of 2020 will be remembered as a special group of students who faced unordinary challenges. May these unique circumstances inspire them to use their skills and talents to make the world a better place.

Sincerely,

Terri Heggemeyer
Career Services Director

The following services are provided by Career Services for students and alumni of Northeast Community College:

- Provide one-on-one advisement and personal attention to students/alumni as they conduct their job search
- Locate websites with vacancy notices to specifically meet the needs of students' job search
- Post jobs daily to northeast.edu/career-services online job board
- Assist with writing and completing resumes, cover letters, and applications
- Conduct mock interviews or schedule employers to conduct mock interviews
- Inform students and alumni of steps in conducting a job search and follow-up techniques
- Host career fairs to connect students with employers
- Provide assessments to explore career interests
- Present workshops on resume/cover letter preparation, job search strategies, interviewing, and dining etiquette
- Multiple resources related to job search are available for review
- Computer room for printing application materials and conducting job search
- Offer lifetime employment assistance to alumni at no charge

For more information about this report and the services offered through Northeast Community College Career Services for both employers and those conducting a job search, visit northeast.edu/career-services.

860

Total
Graduates

360

Total Career and
Technical Graduates
Employed

36

Total AA and AS
Degree Graduates
Employed

94%

Collection
Rate

(1) AA and AS Degrees (General Transfer) section includes Academic Transfer, Athletic Training, Behavioral Science, Biology, Chemistry, Education Elementary, Education Paraprofessional, Education Secondary, Exercise Science, General Studies, Health, Physical Education and Recreation, Human Services, Library Information Services, Mathematics, Music Education, Music Performance, Personal Training, Physical Education - Teacher Education, Pre-Professional Dentistry, Pre-Professional Dietetics, Pre-Professional Engineering, Pre-Professional Health Majors, Pre-Professional Mortuary Science, Public Health, and Social Work.

NOTES:

- Two students completed the Diversified Manufacturing Diploma. They are recorded under the AAS program which they also completed
- The graduates in the Not Found and Non-Seeking columns are not included in the percentage calculations
- Wage information has been self-reported by graduates for their first job upon graduation in positions that are related to their program of study
- In some programs, the low number of salaries reported for related positions were statistically insignificant and/or omitted due to confidentiality, so these fields are represented with a dash (-)
- The National Student Clearinghouse was used to assist in tracking graduates who continued their education

2019 EMPLOYER EVALUATION SURVEY

Paper and online surveys are distributed to all known employers who have hired Northeast Community College graduates. The survey consists of a skills assessment and overall satisfaction of the employers rating of the Northeast graduate and career program. This survey was conducted in 2020 for the graduates of the 2018-2019 academic year. Of the 323 surveys distributed, 155 were completed for a 48% response rate.

90%

of employers would consider hiring Northeast graduates in the future.

94%

of employers rated Northeast graduates as either excellent or good in their career program.

Employers assess on conceptual and technical knowledge, quality of work, oral and written communication, interpersonal and teamwork skills, math, troubleshooting, and behavior.

This survey is conducted by the Northeast Community College Analytics Services Department.

GRADUATE SUCCESS

Career Services is pleased the report reflects an update from 94-percent of the 2019-2020 graduates. When the pandemic hit and our students went to virtual learning, we didn't get the opportunity to have as many face-to-face conversations with the graduates. However, we immediately informed them that we were still available to assist in their job search. The contacts were made through emails, texts, phone calls, social media, mailings, some classroom visits and personal conversations within six months of graduation. "Career Services works diligently in making connections with the graduates because we truly care about their future," says Terri Heggemeyer, Director of Career Services. "Knowing that graduates are reaching their goals ensures that the college is fulfilling its mission."

THE 320-MILE ROAD TO SUCCESS

“Transitioning to Northeast means you will get that one-on-one time and also have the chance to be involved on campus.”

– Ty Goodrich, a Northeast Community College student

“The difference between ordinary and extraordinary is that little extra.” That “little extra,” as quoted by NFL Hall of Fame Coach Jimmy Johnson, is something that seems to resonate well with Ty Goodrich, a Northeast Community College student in his second year in the Electromechanical Technology program.

“My family has taught me to not give up and always keep going,” he said. “I feel weird if I’m not always going.”

Goodrich, who was born and raised in Dallas, Texas, moved to Greeley, Neb., during his senior year in high school where he graduated from Central Valley Public Schools in 2018. During the year, he met with a school counselor on his desire to look for a career where he could use his hands and apply his mechanical aptitude to projects.

The counselor worked to find areas of interest for all seniors at Central Valley with the understanding that in a smaller rural setting, not everyone may be interested in pursuing a four-year degree. Goodrich said she focused on community colleges and had him look into visiting Northeast Community College during one of its Applied Technology division career days.

“I went to see the Electrical Construction and Control, Electromechanical and Automotive Technology programs, but I fell in love with electromechanical because I have an interest in hands-on work

with computers. It’s always what I wanted to do.”

Goodrich enrolled at Northeast in Fall 2018 and settled into the program that trains students skills to install, maintain, and repair complex industrial equipment. In addition, instructors focus on troubleshooting electrical and electronic systems, manufacturing processes, hydraulic and pneumatic operations, motor and logic controls, power transmissions, and robotics and automated systems, among other principles.

Approximately one month into his second year in Oct. 2019, Goodrich attended an Applied Technology Career Fair on the Norfolk campus where employers visited with students regarding prospective employment opportunities. His initial meeting with representatives from BD (Becton, Dickinson and Company) in Broken Bow turned into a job internship that continues to this day.

“They reached out to me and were active in looking for students and possible internships and possible careers.”

In Feb. 2020, Goodrich began factoring in his work schedule with his class schedule at Northeast which meant extreme discipline on his part since the distance between the Northeast campus and the BD facility is 160 miles or a three-hour one-way journey.

He dove in head first, making the drive to Broken Bow after class on Thursday which includes a stop in his hometown along the way. Once at BD, which manufactures a third of the world’s blood collection tubes, among other medical equipment, Goodrich begins clocking in full-time on Fridays and Saturdays, working 32-hours every two-weeks. On Sundays, he’s back on the road, first stopping in Greeley and then back to Norfolk to begin the following week’s classes at Northeast.

“I was getting involved in several projects at BD working on what were the newest and best safety systems,” he said. “I was able to program an entire safety upgrade. I guess I just took advantage of the opportunity.”

A slowdown during the pandemic allowed Goodrich to refine his skills and gain more experience working for the medical equipment manufacturer.

“BD is a good company that has invested in the future - and even through the pandemic, the company invested into upgrading and making their equipment better throughout that entire time. I was able to work on more projects while the lines were not running, including the safety upgrade and troubleshooting on equipment that dates back to the 1960s to today’s modern machines,” Goodrich said. “They told me I caught on fairly fast so they wanted me to continue learning through

continued on page 11

continued from page 10
programming, which is the next step up from troubleshooting.”

From there, Goodrich moved into learning additional design controls and programs. His first project was with a specialized camera used in manufacturing automation, followed by a task to program an OSHA-related safety upgrade on a top-of-the-line machine. He said this particular work allowed him to comprehend the importance of safety in industry and how to properly create an accurately developed safety circuit.

“So, I learned a lot in the design aspects of machines, which especially helped me as I came back to Northeast when we covered troubleshooting in our labs.”

Shanelle Grudzinski, dean of Applied Technology at Northeast, said students such as Goodrich are exactly what industry is looking for. She said the demand for a trained workforce has not waned.

“The technological innovation and skills needed to fill those jobs, however, has grown exponentially. Northeast faculty are routinely undergoing professional development to ensure they can pass along the necessary knowledge and hands-on experiences to students to meet the workforce needs of both today and tomorrow,” she said. “Industry partners are more than ever vital to that success by helping to connect

students to strong career opportunities and bridge workforce readiness skills and technology advances.”

For students to truly be prepared for today’s workforce, they must have a deep understanding of and be able to apply content knowledge learned in the classroom and labs. Grudzinski said academic content is only one part of the recipe for success for many programs at Northeast.

“Cooperative internships and on-the-job training make up the other piece, as it allows students to put their classroom knowledge to practice in a professional environment, cultivate problem-solving and managing difficult work situations, and foster life skills and teamwork. It further enables students to bring their experiences back to the classroom where it enriches instruction as they complete their degree.”

Goodrich concurs. He said the opportunity afforded to him to work at BD has allowed him to get comfortable in programming projects as he continues his education at Northeast. His first-year classes served as a good base for his internship.

“I learned enough on how to troubleshoot through things like relays that allowed me to learn the basics of PLC’s (programmable logic controllers) to build off that knowledge. It was a good stepping stone to keep gaining that knowledge.”

Combined with the internship and his education, Goodrich has used the past two-years as “building blocks” in honing his skills. He credits labs in Northeast’s Applied Technology building in affording him the opportunity to put into place what is taught in theory classes.

“You have to fight through what you don’t know. You have to be able to figure it out and not just sit there and ask questions,” he said. “And that’s what the labs are for. You have time to figure it out. The labs give us real world simulation; it’s as close as we can get. You will learn through the program and then go out into industry and get to the point where you are competent to do the work and succeed in industry.”

Once he graduates with an Associate of Applied Science degree in Electromechanical, Goodrich would like to earn his bachelor’s degree in order to move up in companies like BD. He has a desire to obtain a role as an engineer at BD and work his way up through the company.

“I have met a whole bunch of good people. My instructors have been really good teachers in giving me a basic knowledge that has allowed me to get my foot in the door at BD. And now I see my education and my industry experience as just the tip of the iceberg in allowing me to move forward from here.”

— Leah A. Barrett, President

REGIONAL IMPACT

Northeast not only contributes to the workforce through our skilled graduates and training programs, our regional economic impact is substantial to the northeast region of Nebraska. In a study conducted by Economic Modeling Specialists Intl. in 2018, it was found that Northeast contributed \$236.3 million to the regional economy through our graduates each year. This figure represents the higher earnings that students earned during the year, the increased output of the businesses that employed the students, and the multiplier effects that occurred as students and their employees spent money at other businesses. This added income is equivalent to supporting 4,053 jobs.

Northeast not only contributes to the workforce through its skilled graduates and training programs, its regional economic impact is substantial to the northeast region of Nebraska.

Northeast offers one of only three two-year utility line degree programs in Nebraska.

Auto Body Repair Technology – state-of-the-art equipment: paint booth for waterborne finishes, Sonic computerized measuring for frame and unitized construction, nitrogen plastic welders, resistance spot welder.

Diesel Technology – Agriculture and Truck: In addition to classroom study, students receive over 1,000 hours of lab training. Live project work that goes back out on the road from combines to over-the-road semi-tractors. Stackable credential.

Media Arts programs: Professional facilities include two fully equipped control rooms, four private workstation rooms, a concert stage, and two sound studios.
